Thanks Kathleen. Based on Tim's summary, it sounds like yesterday's prep meeting was productive.

As far as I can tell, Tim and Erin are playing valuable roles in this, but if you have a different opinion (or if you think Jared has a different opinion about WTR's involvement), let's talk before Thursday's briefing.

I'll be on the lookout for the paper you mention.

Try to stay cool there in AZ!

Hi john. I'm really sorry you weren't included on yesterday's call. I should have made sure you were included and available. Bad on me.

I think we have made good progress to prep for Jared. Unlike where we were a year ago I think understanding the big picture (shift in project purpose and importance of leveraging the state board process and BO process) is really Important to the briefing for Jared and Cynthia and ken.

We didn't focus so much on that before as the project itself included a goal of improving the delta. By not including that goal in the current project it really changes the landscape.

I'm in az today and tomorrow at RTOC but can certainly step away to talk over this if you would like. look for a draft paper from the team before thurs.
